The all new Srixon Soft Feel 2-Piece has been re-engineered with a new highly resilient super soft, 71 compression core formulation and new aerodynamics, giving you exceptional distance and soft feel for moderate swing speeds was featured on a Golf Ball Review done by the RateYourCourse golf communities.

The all new Srixon Soft Feel 2-Piece has been re-engineered with a new highly resilient super soft, 71 compression core formulation and new aerodynamics, giving you exceptional distance and soft feel for moderate swing speeds.

Greater accuracy and soft feel at impact are achieved from the highly resilient Energetic Gradient Growth core.

The new 328 aero power dimple design delivers a penetrating trajectory with higher lift force, resulting in incredible carry and distance with superior stability.
